

## Form E – CIPPSR Material Properties Form

Request for Tender – Doc5612523866, Contract No: 26TW-CPI-15CWD  
Part 4 – Form E – CIPPSR Material Properties Form

---

### 1. CIPPSR Material Properties Form

- a. Each Supplier shall complete and upload Table 4E-2 (below) in Part 4.5 – Form E and include any additional supporting documentation as outlined below.
- b. The Supplier shall identify each CIPPSR system to be used on the project.
- c. For each CIPPSR systems, the Supplier must include three (3) lab testing reports (in English) for CIPPSR field installation samples that were produced by the Supplier on a minimum of two (2) different previous projects where the same materials were used to demonstrate the identified design material properties. The lab testing reports must be produced by an accredited test laboratory (e.g., Paragon Systems or other approved testing laboratory for the specific material).
- d. The City will review and validate the submitted lab testing reports as part of the evaluation process to confirm compliance with the requirements outlined in Section 2.c, including report language, project relevance, use of match materials, and field installation origin. Failure to provide verifiable reports demonstrating compliance with these requirements shall result in the bid being declared non-compliant.

**Table 4E-2: CIPPSR System and Material Properties**

Component	CIPPSR System 1	CIPPSR System 2
CIPPSR Tube (Bag): Manufacturer		
Resin: Type		
Resin: Manufacturer		
Resin: Manufacturer's Number		
Design Flexural Strength (MPa) Short Term		
Design Flexural Modulus (MPa) Short Term		
Design Flexural Strength (MPa) Long term		
Design Flexural Modulus (MPa) Long term
